SUMMARY

Software Engineer with 3 years of experience building scalable, cross-platform web applications using React, TypeScript and Java delivering high-performance user experiences with a focus on reliability, accessibility, and clean engineering.

TECHNICAL SKILLS

Frontend Technologies	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux
UI / UX & Design	Responsive Design, Component Libraries, Design Systems, Cross-Browser Compatibility
Backend & APIs	Node.js, Express.js, REST APIs, GraphQL, Java, Python
Devops & Tooling	Docker, CI/CD Pipelines, Postman, Git, GitHub, Confluence, JIRA
Dev Practices	Agile SDLC, Sprint Planning, Estimation, Code Reviews, Collaborative Development

WORK EXPERIENCE

PricewaterhouseCoopers Sep 2021 – Jun 2023

Software Engineer Bengaluru, India

- Delivered enterprise-scale, cross-platform React user interfaces integrated with Java services and SQL data models, powering audit and compliance workflows across eight teams and multiple modules.
- Worked with product and QA teams to refine requirements and reduce workflow friction across six enterprise modules.
- Improved frontend performance for enterprise audit dashboards by optimizing React rendering and data fetching, reducing load time from 2.8s to 2.0s and improving responsiveness for daily users.
- Containerized services using Docker and supported CI/CD pipelines, contributing to a 98% release success rate.

Connyc Inc. Aug 2025 – Dec 2025

Software Engineer Intern New York, NY

- Built shared React TypeScript components adopted by five teams, reducing UI duplication by 8% across production dashboards.
- Reduced cross-team dependency risk by sharing reusable components and frontend best practices across multiple product teams.
- Redesigned data-driven dashboard filters with React and Chart.js, raising engagement from 15% to 35% for 13,700 users.
- Optimized GraphQL queries and React rendering with Profiler, reducing production dashboard load time from 2.1s to 1.8s.
- Reviewed code against SDLC standards, improving consistency, surfacing risks earlier, and raising overall software quality.

University of Wisconsin-Madison iSchool Jun 2024 – May 2025

Software Engineer Madison, WI

- Owned end-to-end development of a full-stack job portal serving 500+ students, from feature design through deployment.
- Built React-based, responsive UIs integrated with Node.js and REST APIs, ensuring usability across devices and screen sizes.
- Enabled library placement workflows by building API-driven services with RBAC for admin, student, and partner library users.
- Enhanced placement visibility by building admin dashboards with seven charts tracking offers and acceptances.
- Deployed frontend assets using AWS S3 and CloudFront, improving Lighthouse mobile performance score from 68 to 91.

RecWell Apr 2024 – Jun 2024

Software Engineer Intern Madison, WI

- Developed a responsive dashboard for campus recreation serving 23,550 users, reducing load time from 450ms to 150ms.
- Designed a frontend component library integrated with Node.js APIs, enabling consistent theming across 11 React pages.
- Identified and resolved production UI bugs using Chrome DevTools, improving stability during high-traffic usage.

ACADEMIC PROJECTS

AI Expense Tracker | *TypeScript, React.js, OpenAI* Mar 2025 – May 2025

- Developed AI-powered expense tracker that auto-categorizes transactions using OpenAI, reducing manual tagging time by 70%.
- Implemented natural language querying to enhance user accessibility to spending data with instant summaries.
- Designed personalized budgeting insights improving financial decision-making through pattern analysis and overspend alerts.

UW Library AIM Portal | *React.js, Java/Spring Boot, Docker* Sep 2024 – Dec 2024

- Mapped Figma designs into a scalable prototype, boosting navigation/data access 3x for 500+ users with React/REST APIs.
- Containerized prototype with Docker Compose for seamless handover, enabling 1-click deployment across 3 environments.

EDUCATION

University of Wisconsin-Madison May 2025

Master of Science, Information Science (GPA: 3.9/4) Madison, WI

Dayananda Sagar Academy of Technology and Management Aug 2021

Bachelor of Engineering, Information Science and Engineering (GPA: 8/10) Bengaluru, India
